

# Lead the engineering excellence behind an exceptional guest experience

**Deadline:**  
30-08-2026

**Contact person:**  
Petra Andersen

**Location:**  
Kongens Nytorv 34, 1050,  
København K

Would you like to become part of a motivated team with high ambitions in a privileged environment? Are you passionate about maintaining the highest standards and ensuring exceptional quality behind the scenes? Do you enjoy leading a skilled team while creating the foundation for unforgettable guest experiences?

Then we would love to hear from you, as d'Angleterre is now looking for a Head of Engineering to lead and develop our Engineering team and ensure the flawless operation of one of Copenhagen's most iconic luxury hotels.

As Head of Engineering, you will play a key leadership role, ensuring that our building, facilities and technical systems operate safely, efficiently and sustainably. You will lead a dedicated Engineering team, manage technical projects and investments, and work closely with the Executive Leadership Team to support the hotel's operational excellence and long-term strategy.

## We offer

A professional work environment where we always strive to provide our guests with personalised, stylish and elegant experiences of international standard. We are a dynamic team with high ambitions and room for development. We are dedicated to our guests, our colleagues and our workplace.

We offer a healthy work environment and a culture where you will work with colleagues from all over the world. Through our internal d'Anglecademy, you and your team will be trained in various programmes to provide you with the best possible opportunities for growth and success.

## About the Job

As Head of Engineering, you will have overall responsibility for the Engineering Department and the hotel's technical operations. Your responsibilities will include:

- Leading, developing and motivating the Engineering team.
- Ensuring the safe, reliable and efficient operation of all technical systems, including HVAC, electrical, plumbing, refrigeration, kitchen equipment, elevators and Building Management Systems (BMS).
- Developing and managing preventive maintenance programmes to maximise asset reliability and minimise operational disruption.
- Managing departmental budgets, maintenance costs and energy consumption.
- Managing external contractors, suppliers and service providers.
- Ensuring compliance with all applicable legislation, health and safety regulations, and technical standards.
- Overseeing fire protection systems, emergency preparedness and statutory inspections.
- Driving energy efficiency, sustainability initiatives and continuous operational improvements.
- Maintaining technical documentation, maintenance records and asset registers.
- Working closely with all hotel departments to ensure the Engineering function consistently supports an outstanding guest experience.

## About You

You are an experienced technical leader who combines strong engineering expertise with excellent leadership and organisational skills. You hold a relevant technical qualification and have leadership experience within engineering, facilities management or technical

operations, preferably within hospitality or other complex commercial environments.

You have knowledge of building systems, HVAC, electrical installations, plumbing, BMS/CTS and preventive maintenance. You have experience managing budgets, CAPEX projects and supplier relationships.

You are passionate about operational excellence, continuous improvement and sustainability. You are a confident communicator who collaborates effectively across all levels of the organisation and thrives in a fast-paced environment where no two days are the same.

You are fluent in English and preferably also in Danish.
